

OPEN TOP DRUM

Open head drums are used for storing high-density liquids/grease. This packaging allows easy filling and removal of the contents. For OH top, lid shall be secured to the barrels by a 1.2 mm galvanized/MS locking ring and clamped with the help of a lever / 100 mm long GI NutBolt, secured with rubber gasket.

Kiwi Drums offers Open Head Drums right from 0.80mm thickness to 1.2mm thickness and combination of various steel thickness.
