

Close Top Drum/Tight Head Drum

These drums have a fixed top and bottom with two closures of 2" and ¾". Body is Electrical Resistance welded and ends are Double/ Triple Seamed as per customer requirements. We offer Tight Head Drums right from 0.80mm thickness to 1.50 mm thickness and available on combination of various steel thickness.

Features & Benefits:

- Drums are subject to helium leak detection test to 100% leak-proof ness
- Special HGHH paints are used for a high-quality finish for the drums with customized screen printing
- Triple seamed to give extra strength to the drums
- Provision of UN Certification for hazardous products.

Applications

- Tight head drums are suitable for lower viscosity liquids such as fragrances or beverages.
- Store lower viscosity liquids and higher viscosity products.
- A tight/closed-head drum would typically have 2 bungs, one 2" and one ¾" in diameter.
